COURSE MANAGEMENT TOOLS

Click on the images to access the websites!

Chamilo

Free platform for training purposes. Characterized by its simplicity, this is an intuitive LSM platform which allow us to connect with a group of students and collaborate with the educational community.

Chamilo

aming & Collaboration Softw

Google Classroom

Free Google platform that facilitates collaboration between learners and instructors. It is easy to use and integrates various Google Apps (Docs, Forms, Presentations, Jamboard...).

ClassDojo

Communication platform with a strong gamification style. It is free for teachers and has pricing options for schools. It connects every branch of the educational community and builds class communities.
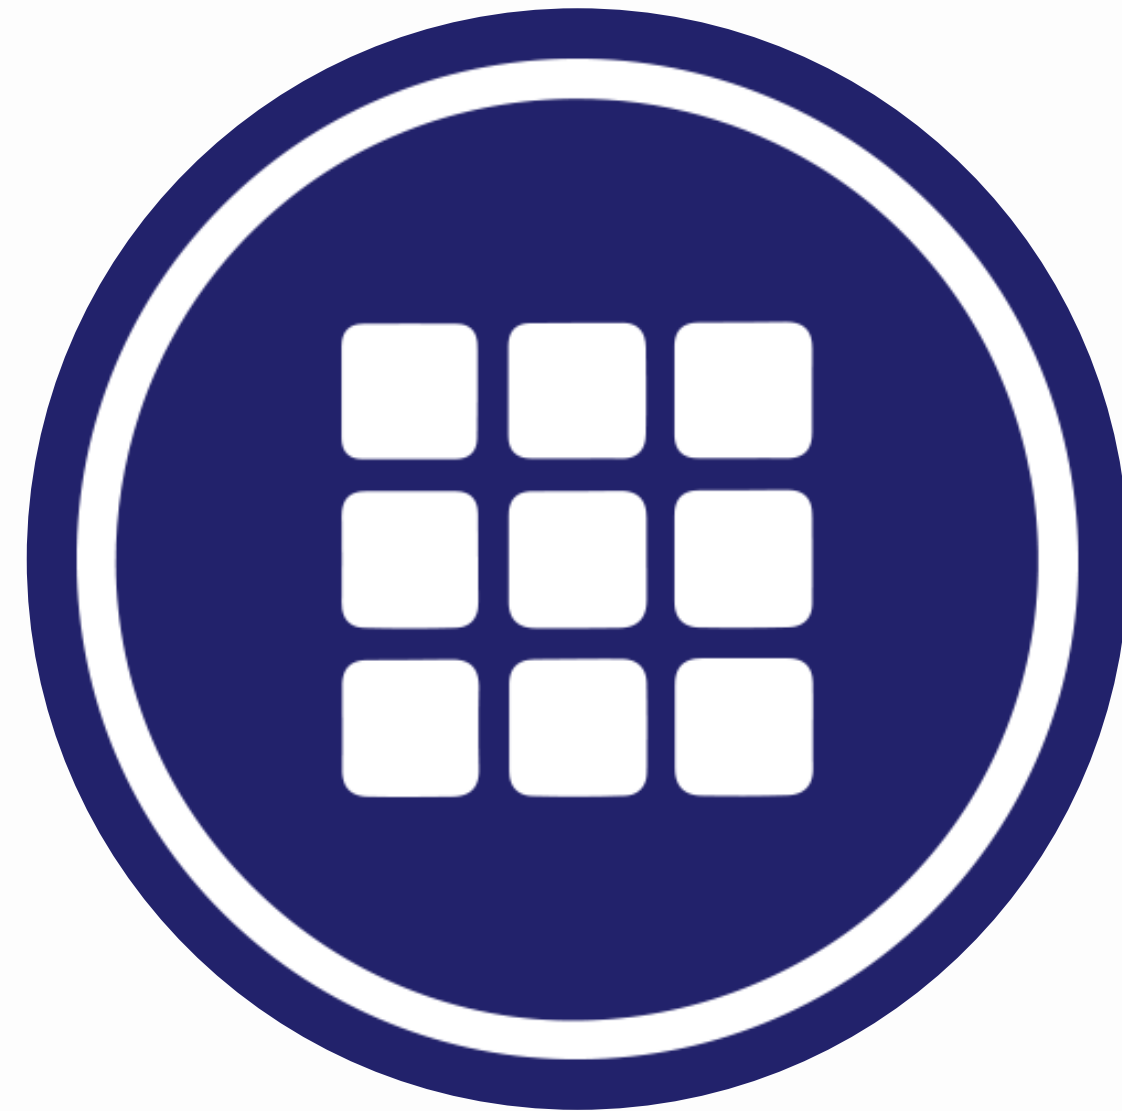

Blackboard

Flexible resource that promotes efficient environments that support education as it's happening instead of asking education to fit the technology. The creators define Blackboard as *Low-maintenance. Modern. Simple. A new kind of LMS.*

Symbaloo edu

Platform for managing and distributing personalized content. Upload online and easy-to-access documents and presentations, create links and share the experience with your students.

Canvas LMS

It can be adapted to every stage in education. Teachers can communicate with individual students, groups, the entire class, or even parents through messaging, audio notes, video, and more. It offers several products for education.
